WAXESS

For beautiful timber, naturally

For the love of wood

We love wood. We love how it looks and we love working with it. It's what we've been doing for the last 30 years and during that time, our mission has been simple: To find a natural, safe, hassle-free way to make wood look beautiful.

The good news is that we've found the answer: **Evolution Hardwax Oils**. When it comes to wood coating products, we consider ourselves ultra-fussy, but **Evolution Hardwax Oils** really do tick all the boxes for us. Made in Germany and used extensively around the world, this is a truly exceptional product that we believe will surpass your expectations.

Here are a few reasons why Whittle Waxes' range of **Evolution Hardwax Oils** are so good:

Evolution is safe

You can literally eat off hardwax-treated wood. They are made from non-toxic, natural products that contain no biocides or preservatives. Once dry, they are safe for humans, animals and plants and they comply with DIN 53160 and EN 71 for children's toys.

Evolution is kind to the environment

Made from natural, sustainable raw materials such as beeswax, carnauba wax, candelilla wax, linseed oil, sunflower oil and jojoba oil, this product has no negative effect on our planet.

Evolution is user-friendly

They are easy to apply and very forgiving (it's difficult to mess up!), and they are quick drying. After use, your rollers or brushes can be easily cleaned using Whittle Waxes' Special Thinner or white spirit.

Evolution is hard-wearing and low maintenance

Once you've put on a couple of coats, your wooden creation is going to look good for many years. If it does fade at all, you could add another coat after a number of years, in most cases with minimal preparation.

Evolution offers an attractive finish

Available in a range of finishes and colours, you are guaranteed to find the right hardwax oil to suit your project.

Evolution lets the timber breath

Its microporous properties allow the timber to breath. In other words, instead of creating a skin, it integrates with the timber which means no cracking over time.

Evolution is economical

A little goes a long way, so you really don't need much, which makes it very cost-effective.

Evolution is water-resistant

This makes them perfect for kitchen counters and bathrooms. They are also grease-proof, non-toxic and food safe so even fine for food preparation areas. Two coats of hardwax oil will not be affected by household cleaners.

Whatever your needs, we've got you covered:

Evolution Hardwax Oils

Available in Matte, Classic, Satin and Gloss finishes

Evolution Colour Range

Available in a range of 10 colours.
